Re: Wastewater Utility Camera Truck Replacement

Mayor and Board Members,

At the July 25, 2023 meeting I requested the Board's permission to obtain a quote for an iBak Rapid View camera system and truck for our pipeline assessments and inspections. The Doheny Company provided the attached Sourcewell quote as they are the statewide distributor for iBak. The quote that we received is for the replacement of the truck chassis and camera equipment and includes the installation and startup training on the new system. The total cost for this purchase is \$330,208.01 and will be split 50/50 with the Stormwater Utility. A trade-in value was offered for our current truck and equipment, but we have opted to keep the truck and remove and sell the equipment separately. The estimated lead time for delivery of the new truck and equipment is March or April of 2024. If approved, the funds for this purchase will need to be encumbered.

At this time, I am requesting the Board's approval for the purchase of the iBak Rapid View camera system and truck for the total cost of \$330,208.01 to be split between the Wastewater Utility and the Stormwater Utility. A copy of the proposal has been included for your review. Please let me know if you have any questions or if any other information is needed at this time.

Best Regards,

A handwritten signature in blue ink, appearing to read "Nicholas Dezelan".

Nicholas Dezelan, CHMM, ASP  
Wastewater Utility Manager

Cc: Jane Webb – Utility Coordinator  
Dan Miller – Stormwater Coordinator
