This notice is acceptable to be posted at the project site to verify NPDES permit coverage. If the project is regulated by a Municipal Separate Storm Sewer System (MS4), you are required to post additional information as required by the MS4 that has jurisdiction (i.e. MS4 Permit, etc). NPDES permit coverage does not supersede local requirements that may be required to conduct activities associated with this project.

If the project is regulated by an MS4, direct inquiries to the local MS4.

If this project is outside an MS4 or owned/operated by an MS4, inquiries may be directed to the IDEM Stormwater Program at Stormwat@idem.IN.gov.

The Notice of Intent (NOI) submitted online is your certification that the project meets the requirements of the construction stormwater general permit (INRA00000). The NOI is submitted to obtain NPDES permit coverage for the proposed activities at the project site and does not constitute approval to conduct activities that are related to other local, state, or federal permits.

If information is not accurate it is the responsibility of the permittee to update the information. If it is determined that information is inaccurate or deficient you may be requested to address those items.

If the project is within a Municipal Separate Storm Sewer System (MS4) and regulated by the MS4, the Construction/Stormwater Pollution Prevention Plan (SWP3) review was completed by the MS4 or their representative and verification by the MS4 was part of the application submission. All MS4 stormwater approvals must be obtained prior to beginning land disturbance at the project site. Once construction begins, the MS4 has primary responsibility for compliance and enforcement of stormwater regulations within their local jurisdiction.

A National Pollutant Discharge Elimination System (NPDES) authorization number is assigned to each project for which an NOI has been submitted to obtain permit coverage. This number is used as a reference for the project and must be included with any future correspondence submitted to IDEM.

It is important that all activities associated with your project are in compliance with the requirements of the Construction Stormwater General Permit (CSGP) and where applicable all local MS4 ordinances/stormwater permits. In accordance with the CSGP, you are required, at a minimum to implement your SWP3, implement and maintain all stormwater management measures, monitor the effectiveness of the measures and take corrective actions until the project is complete and terminated. To maintain compliance, it may be necessary to modify the SWP3 as work progresses.

Upon completion of the project, you are required to terminate permit coverage. Criteria for termination eligibility can be found in Section 6.0 of the CSGP. If this project is permitted through an MS4, there may be local requirements/approvals that must be met prior to filing a notice of termination with IDEM. If an MS4 has adopted a requirement for termination, you are responsible to comply with all local provisions prior to submitting the Notice of Termination to IDEM. Failure to meet local MS4 requirements may constitute a violation of the local MS4 ordinance.
